SUMMARY

Computer Science graduate and Full-Stack Developer with experience building, deploying, and maintaining scalable web applications using JavaScript, React, Node.js, SQL, and REST APIs. Hands-on experience with n8n AI workflow automation, API integrations, webhooks, and database-driven systems. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks.

EXPERIENCE

RZ Technology (via PSEB Apprenticeship Program)

Nov 2025 – Aug 2026

MERN Developer

- Developed and maintained scalable web applications using modern software engineering practices.
- Designed and integrated RESTful APIs to support secure and efficient communication between systems.
- Improved backend performance by optimizing database queries, reducing response times by approximately 40%.

National Incubation Center (NIC)

May 2024 – Oct 2025

Full Stack Developer

- Developed a location-based food delivery platform using modern web technologies.
- Implemented vendor management features, order tracking, and real-time location services.
- Integrated third-party APIs to improve application functionality and user experience.

PROJECTS

AutoCraft Japan – Vehicle Management Platform

- Developed and maintained a full-stack vehicle management platform.
- Implemented secure media management using Cloudinary.
- Improved application performance, scalability, and user experience.

Al Noor Education – Connect Youth With Quran

- Developed a full-stack educational platform for online learning and course management.
- Implemented secure authentication and role-based authorization.
- Designed responsive user interfaces and integrated cloud-based media storage.

EduAI – AI-Powered LMS Platform

- Developed an AI-powered Learning Management System.
- Integrated machine learning models for intelligent recommendations and content summarization.
- Designed scalable backend architecture and optimized database performance.

TECHNICAL SKILLS

Computer Science Fundamentals: DSA, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks.

AI Automation: n8n, AI workflow automation, webhook automation, API integrations, workflow design.

Languages: JavaScript (ES6+), SQL, Java, PostgreSQL.

Frontend: React.js, Redux, Tailwind CSS, Material UI, HTML5, CSS3.

Backend: Node.js, Express.js, REST APIs.

Databases: MongoDB, MySQL, PostgreSQL.

Deployment: Vercel, Render, Railway, AWS, Docker.

EDUCATION

Kohat University of Science and Technology

July 2025

Bachelor of Science in Computer Science, CGPA: 3.7/4.0
